Times Tables Triangle Fact Game:

The times tables triangle cards can be used to play a game by scoring points based on the colour of the triangle. Cards start face-down, so that players can't tell the colour of the triangle. Player B, whose turn it is, points to a card. Then Player A picks it up and covers a number with their thumb.

If Player B correctly works out the value of the covered number, they score points. Points are scored like this: Green = 1pt, Blue = 2pts, Light Purple = 3pt, Magenta = 4pt. The value of 'Gold' triangles is determined by the roll of a die. If you roll 6, score 6 points. **The first person to score 21 points wins!**
